## **Property Editor Toggle Command**

Prior to starting, ensure you have Installed the iPropWiz 7.xx.1.243 or later build.

1. Right-click in the Inventor ribbon and click Customize User Commands.

	Ribbon Appearance	•	
_	Show Panels	•	
~	Show Panel Titles		
	Customize User Commands		
	Undock Ribbon	45	
	Docking Positions	+	

2. In the Customize dialog, click the Keyboard tab.

	2 Marking Menu
Change commande	2
choose commands/	Vou:

3. Select iPropWiz from the Categories drop-down list.

4. Click the Keys column to the left of the PE Toggle command.

Categories:	iPropWi	z v
Keys	×	Command Name Configuration Editor PE Toggle Property Editor

5. Press and hold any combination of the Ctrl, Alt, and Shift keys and then press an alphanumeric character [A-Z, 0-9] to define the shortcut. The shortcut is displayed in the Keys column.

Keys		Command Name	
		🔅 Configuration Editor	
Alt+Ctrl+Z	×	🔀 PE Toggle	
	1100018	🟃 Property Editor	

- 6. Click OK or click Apply and then lose the Customize dialog.
- 7. Open a document and then open the iPropWiz Property Editor (PE).
- 8. Test the shortcut while Inventor has the focus, and when you are working in the PE. Use the shortcut again to re-enable the PE.

**Note**: The shortcut performs the same action as clicking the Active button at the end of the PE toolbar.
